

**WRIGHT** 

**THE  
WRIGHT  
WAY**

**THERE'S ALWAYS  
THE EASY WAY, AND  
THEN THERE'S THE  
WRIGHT WAY.**

Since 1927, 'hard work' has been more than just a slogan and 'easy' just isn't part of our family vocabulary. Getting the job done is the truest test of any tool however, ensuring your safety is our company's purpose.

# USING THE WRIGHT SAFETY PROGRAM

**THIS SAFETY PROGRAM PRESENTATION WILL PROVIDE PEACE OF MIND IN KNOWING THAT YOUR EMPLOYEES HAVE BEEN PROPERLY TRAINED AS WELL AS DOCUMENTING THE FACT THAT THE TRAINING WAS CONDUCTED.**

The Wright Way Safety Program includes a PowerPoint presentation along with an introductory video on Wright. Included in the program will be handouts, stickers, and merchandise for you to distribute to end users. A Safety Evaluation Form and Certification Documentation for employees will be provided for filling out upon completion of the training. These forms are then kept in the employees' personal files. This program is designed so that you can ensure that your workers have been taught how to safely use hand tools. It will not only help protect your workers from accidents, it also will help protect your company against liability resulting from improper tool use.

## **Wright Way Safety Presentation**

This presentation provides a comprehensive training program on the right and wrong ways to use hand tools—specifically wrenches, ratchets, sockets, and attachments. It includes safety tips, do's and don'ts, and instructions on how to use tools properly for all skill levels.

## **Wright Drive Chart Decal**

Designed to be applied to a tool cabinet or toolbox, these decals provide tool users with a quick reference to end the confusion between inch and metric sizes. It also recommends a drive size for each wrench.

## **Safety Training Documentation**

After employees complete the presentation, have them sign the documentation forms. These forms are to be kept in the employees' personal files as proof that they received proper training in hand tool safety.

## **Hands-on Demonstrations**

You will be shown examples of worn and new fasteners, as well as new and worn tools. Within the presentation will be break points where we will stop to discuss and actually demonstrate safe tool practices.

## **Immeasurable Value**

It may take an hour or so to present the program, share the video, hand out the Reference Materials, and have the employees sign the Documentation Forms however, it's a small investment in time for a program that will help prevent injury and save lives.

## **Good Will**

By conducting this safety program, you'll be letting your customers and/or employees know that you're genuinely concerned for their health and safety. Good safety practices benefit everyone.
